

Sit back and let us setup your site from start to finish!

Even though AppStacks Canvas comes loaded with most features you will ever need, there is considerable effort to get large sites up and going and ready to go live. Our experts can work with you and identify all tasks needed, define the action plan and take it to completion. This package allows you to maximize the power of AppStacks Canvas making sure features and functions are setup right.

Cost: **\$2500**

What you get:

- Assigned project manager to meet over the phone and gather all information needed
- Creation of project plan and schedule to be approved by you
- Creation and setup of new website navigation structure
- Importing of registered users from your pre-existing system (assumes the existing system implements a way to export users)
- Importing of content from your pre-existing system (up to 50 pages)
- Setup of content for all Canvas core features: Ads, Classified, Business Directory, Events, Documents Manager, Newsletter, etc.
- Implementation of work and delivery for your review
- Support of all work completed for 30 days after go live

Note that tasks are limited to functionality available and included on Canvas. Additional features not present on AppStacks Canvas might be available at an additional cost.
